PRIMARY EXAMINER

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Claim 3:

Line 11, "wherein the" has been changed to --a--.

The changes have been made to correct lack of antecedent for the first clamping circuit and to place the application in a condition for allowance.

2. The following is an examiner's statement of reasons for allowance: the amendment filed 3/1/2005 has overcome the prior art of record. The prior art of record fails to teach or fairly suggest a first clamping circuit comprises a first switch which is turned off when the potential levels of the first and second ports have logic levels different from there reference logic level, and it is turned on when the potential of one of the first and the second port has a logic level equal to the reference logic level as called for in claim 3, second, third and fourth rectifying elements, a logic circuit and the connection therein as called for in claim 22. Therefore, claims 3-14 and 16-24 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
